

AEC Sensors

AEC Automatic Environmental Control

PRODUCT OVERVIEW

Rev: 05/2006

The AEC sensors is able to give you an insight into the monitor without opening the device at any time.

Since the communication is performed by an interface, the following PC or the operator are able to innovate the valuation. The daily visual inspection round is not necessary.

Operating and environmental states are issued in data retrieval. The system works with a data protocol request / response / command request. Setting command responses are:

- Temperature: within the unit
- Controlling the ventilator rotation (version IP 65)
- Controlling the backlight function (depending on the display)
- Display serial number response / get display serial number
- The operating hours are counted by the integrated counter.

In addition to those settings, the AEC sets parameter as brightness and contrast. The firmware update is an easy online download.
